

Now Available - VIAS 2

TimeMark's long-awaited software, VIAS 2, is now available for immediate download from our Customer Support website. This is the first major advancement to our flagship application since 2005.

New features include

- Seamless operation on Windows® 7 (64 or 32 bit) as well as Windows® XP
- Takes advantage of multi-core processors
- Updated controls and layout
- E-mail reports directly from VIAS
- Automated data checking and result verification
- Over 60 standard reports
- Customize your reports with graphics
- Improved vehicle analysis
- Create and save analysis parameter sets for different situations

A bulletin containing a longer, more detailed list of new features is available on our website.
